

1. Which meetup did you attend?
 - a. I attended Husker Harvest Days.
2. What did you learn?
 - a. Along with seeing other new technologies such as drone sprayers, and an autonomous tractor, there was a vendor who was selling generic pivot monitoring equipment, which is what I want to build with the knowledge from this course.
3. Did you meet anyone new?
 - a. I met a vendor who was also selling irrigation pivot monitoring equipment. It helped give me a new reference point to the market for off brand monitoring equipment.
